Community Service Assessment Centers

Prototypes’ Community Service Assessment Centers (CASC) assist adult clients in obtaining the appropriate treatment services and linking them with any necessary resources. These services are available to all adults in Los Angeles County that have a primary substance use disorder and other co-occurring disorders. Our staff supports each client in their transition between Prototypes’ assessment and their entrance into treatment.

- Substance use disorder assessment and referral to appropriate treatment services
- Referrals to other ancillary services: mental health, domestic violence, housing, food banks, shelter, low cost medical and dental clinics
- Transportation for assessment appointments as well as their initial intake appointment for treatment
- Education regarding HIV, Hepatitis C, and sexually transmitted diseases

Programs supported, in part, through funding from the Los Angeles County Department of Mental Health and the Los Angeles County Department of Public Health, Substance Abuse Prevention and Control.
Prototypes Outpatient Behavioral Health Centers provide comprehensive, integrated, and individualized services that range from brief intervention to intensive treatment. These services are available for men, women, transitional age youth and children of all ages. Clients who come to Prototypes are at risk for or have substance use/dependency and/or mental health disorders. Services follow a “whatever it takes” approach to empower clients to reach their fullest potential and include:

- Outreach and engagement
- Individual, group and family therapy
- Mental health rehabilitation
- Case management
- Medication support services
- Addiction counseling
- Crisis intervention
- Mental Health Wellness Center and Field Capable Clinical Services
- Medication assisted treatment
- Community re-entry services

**Intensive Outpatient Programs**, including Full Service Partnerships and Substance Use Treatment Programs, provide structured daily groups and treatment. Clients are still able to maintain work and school commitment with a minimum commitment of 9 hours per week.

**Prevention Services** aim to promote healthy families through culturally competent outreach, support groups, educational groups, school interventions, home visits and linkage to community resources and events.

- Educate the community about substance use and mental health issues
- Support for children, adults and families with risk factors associated with substance use and mental health issues including child maltreatment and/or who are part of the child protective services system

**Specialized Services**

**Prototypes’ Child and TAY Services** provide therapeutic mental health services for children and families including infant mental health (0-5 years old), children and adolescents (6-15 years old), and young adults (16-21 years old). Services are provided in locations to fit the needs of the client and family including Prototypes’ offices as well as field-based locations (home, school, community). Support for parents includes family therapy, parent education classes, and collateral sessions.

**Perinatal Substance Abuse Treatment Services** address treatment and recovery issues specific to pregnant and postpartum women such as sexual and physical abuse, relationships and development of parenting skills. Individual and group counseling for women focuses on vocational and education issues, understanding of their relationship to substance abuse and preventing relapse.

**Payment Options**

Prototypes works closely with each client to make treatment affordable and accessible whether through health insurance, private pay, government funding or other resources. We accept most PPO/HMO insurance plans. Help is available.
